C58

CAD computer-aided design

Index to Volume 11 Numbers 1–6, pages 1–368 ISSN 0010-4485

SUBJECT INDEX

A
Adopt 201
AESOP: an architectural relational database 217
Aeronautics 45
AMDES 59
Architecture 66, 217
Architecture of a virtual graphic database system for CAD 132

B
Bandler-Charalambous algorithm 27
BAPS, beam and plate analysis 102
Batch production 91
BDS 253, 329

BOOKS AND PUBLICATIONS
Abbas, S A (ed) CAD-ED 189
Benasson, S and Burgess, K Computer programs for daylighting in buildings 112
Booth, K S Tutorial: computer graphics 360
Bundy, A (ed) Artificial Intelligence 243
Burgess, K S Computer programs for energy in buildings 360
Cardenas, A F Database management systems 191
Faux, I D Computational geometry for design and manufacture 243
Giloi, W K Interactive computer graphics 190
Hamilton, I Computer programs for structural steelwork 361
Hill, E Comparative study of very large databases 191
Hillyard, R Dimensions and tolerances in shape design 244
Latombe, J P AI and PR in CAD 244
Lund, P Generation of precision artwork for PCBs 54
Newkirk, R T Environmental planning for utility corridors 361
Smith II, R J Physical design automation 189

Boolean vector algebraic structures: properties and applications to digital logic simulation 315
BOS 151
BUILD 253
Building description techniques for rationalized traditional construction 325
Building Regulations, The 273

C
CAAD 66, 325, 329
CAD: state of the art 85
CAD/CAM 85, 146, 105, 184

CAD CENTRE SCENE
Facial recognition 183
Process design software 232
CADRAW 66
CAM 85, 91
CAM in batch production 91
CEDAR 3 305
Chemical engineering 5, 136, 232
Circuit design using a recent minimax approach 27
Computer-aided approach to route location 23
Computer-aided project evaluation for chemical process plants 5
Computer-assisted logical database design 169
Computer communications 91
Computers and building regulations 273
Computer technology and employment 85
CONCEPT, flowsheet simulation 232

CONFERENCE REPORTS
CAD in aeronautics 45
CAD of control systems 363
Computer representations of shape 239
Computers in engineering 105
Computer technology and employment 85
Database seminar 240
Design III 44
EEC symposium on CAD of digital electronic circuits and systems 187
Engineering software 363
Interactive techniques in CAD 42
Mathematical methods in computer graphics and design 187
13th Tech conference 239
Which graphics system 104

Construction industry 85, 365
Cost estimates 5
Cost response 195
CPIIO 195
CSDL 119
Cubic splines 13

D
Databases : see special issue (May) pp 113–192, 217, 241
Data processing 59
Day lighting 112
Descriptive databases in some design manufacturing environments 151
Design data requirements in the process industries 142
Design development and description using 3D box geometries 329
Design methodology 121
Desktop computers 79, 85
Digital circuits 37
Digital description language 289
Digital logic 315
Digitizers 227
3D box geometries 329
3D input for CAAD systems 66

DOC CASE STUDIES
Finite-element method and reinforced concrete slabs 102
Guildford Crown Courts sketch design appraisal by CEDAR 3 305
Introducing computers into the multi-disciplinary practice of Reiach Hall Blyth 358
Management of the introduction of CAD for river embankment design
Vizualizing the Leyland Vehicles Centre 40

E
ECONOMIST 5, 233
Electron-beam exposure system AMDES 59
Electronic circuits 209, 281
Electronic engineering 85
Eliminating hidden edges in line drawings 71
Embankments 102
Employment 58, 85
Energy 91, 112, 273, 305, 360
EUCLID 253
Evaluation criteria for logical database design methodologies 121

F
Facial recognition (CAD Centre scene) 183
Family generation in integrated engineering systems 136
Family of cubic splines with one degree of freedom 13
Finite-element method and reinforced concrete slabs 102
Finite element methods 33, 102

G
GDOPT 201

Gear-tooth generation with interactive graphics 353
Generation and sensitivity of input/output DC plots 37
Geometric modelling : a survey 253
GLIDE 253
Graphics 104, 132, 195

H
HARTRAN: a digital description language 289
Health and Safety at Work Act 142
Hidden line elimination 71

I
Improving nonlinear electronic circuit simulation 209
Integrating language and database for CAD applications 127
Interactive computer methods for design optimization 201
Interactive graphical program portability 349
Interactive graphics 132, 349, 353
Interactive structural design with computer graphical output 195
Introducing computers into the multi-disciplinary practice of Reiach Hall Blyth 358

L
Letters to the Editor 251
LIGHTPEN
Databases in perspective 117
Formula for survival of the UK 194
Merging of the technologies 250
Microprocessors and jobs 58
Robotics and design 314
Silent software revolution 2
Low frequency switching circuit model of a thyristor 281

M
Management of the introduction of CAD for river embankment design 96
Mechanical drafting on a desktop computer 79
Mechanical engineering 79, 85
Mersey tunnel 102
Microprocessors 58
Minimax 27
Minimizing 'cut and fill' costs in roadmaking 337
Multibus digital circuits 315
MULTICOL distillation simulation 232

N
Numerical control 239

O
Offshore structures 109, 184, 245
Optimization 27, 201
OXSYS 325

P
PARTIAL 66
Pattern data 59
PCBs 54, 297
PDMS 107, 142
PHIDAS – a database management system for CAD/CAM application software 146
Polyhedron Interrelationship Model 325
Portability 349
Precast concrete 195
Process design software (CAD Centre scene) 232
Process industries 5, 136, 142, 232
Programs for two-sided PCB design 297
PSSHAK 66

R
Rationalized traditional construction 325
Reinforced concrete 102
ROMULUS 151
Route location 23, 297, 337
RUCAPS 358

S
Scanning digitizers 227
Sculpturic design of structures using finite elements 33
Semantic datamodel requirements and relization with a rational datastructure 158
Shape modelling 253
Site excavation 180
Somel system: computer aids for the fabrication of structural steel 342
Splines 13
Structural design 195
Structural steel 342, 361
Surface drawing made simple 19
SYMBOL, mass balance calculations 232

T
Thames barrier 96
Thyristor modelling 281
Tools for designing conceptual schemata of databases 119

U
UT-CONCEPT system 5

V
Visualizing the Leyland Vehicles Centre 40

AUTHOR INDEX

Afimiwala, K A Interactive computer methods for design optimization 201
Aish, R 3D input for CAAD systems 71
Akbarzadeh, A A Sculpturic design of structures using finite elements 33
Andam, K A see Knapton, J 193
Baer, A Geometric modelling: a survey 253
Beaumont, M J AESOP: an architectural relational database 217
Bown, G C S HARTRAN: a digital description language 289
Bradley, D P see Dimmer, P R 349
Bryant, P R see Hajj, IN 37
Buchmann, A D and Dale, A G Evaluation criteria for logical database design methodologies 121
Charalambous, C Circuit design using a recent minimax approach 27
Cooley, P Mechanical drafting on a desktop computer 79
Cooley, P Gear-tooth generation with interactive graphics 353
Dale, A G see Buchmann, A P 121
Dimmer, P R Interactive graphical program portability 349
Eastman, C see Baer, A 253
Eaglesham, G CAD: state of the art 84
Eigner, M see Grabowski, H 158
El-Turkey, F M see Charalambous, C 27
Farshad, M see Akbarzadeh, A A 33
Fischer, W E PHIDAS – a database management system for CAD/CAM application software 146
Gambart, D Improving non linear electronic circuit simulation 209
Ghani, S N Low frequency switching circuit model of a thyristor 281
Godwin, A N Family of cubic splines with one degree of freedom 13
Grabowski, H Semantic datamodel requirements and realization with a relational datastructure 158
Griffiths, J G Eliminating hidden edges in line drawings 71
Hajj, IN Generation and sensitivity of input/output DC plots 37
Henrion, M see Baer, A 253
Hoskins, E M Descriptive databases in some design manufacturing environments 151
Hoskins, E M Design development and description using 3D box geometries 329
Howard, R Visualizing the Leyland Vehicles Centre (DOC case study) 40
Hubbard, G U Computer-assisted logical database design 169
Knapton, J Interactive structural design with computer graphical output 195
Kunii, H S see Tosiyasu 132
Kunii, L see Tosiyasu 132
Lafue, G M E Integrating language and database for CAD applications 127
Lane, V P Case study: management of the introduction of CAD for river embankment design 96
Leesley, M E see Rodriguez-Miaja, F E 5
Lucio, T P see Rosa, R C 297
Madden, J Design data requirements in the process industries 142
Maral, G see Gambart, D 209
Mayne, R W see Afimiwala, K A 201
Paton, I A Introducing computers into the multidisciplinary partnership of Reiach Hall Blyth 358
Phillips, R J Computers and building regulations 273
Raven, G K Somel system: computer aids for the fabrication of structural steel 342
Richardson, D see Beaumont, M J 217
Rodriguez-Miaja, F E Computer-aided project evaluation for chemical process plants 5
Rosa, R C Programs for two-sided PCB design 297
Rosenthal, D S M Building description techniques for rationalized traditional construction 325
Roulston, D J see Hajj, I N 37
Roussopoulos, N Tools for designing conceptual schemata of databases 119
Roy, G G Computer-aided approach to route location 23
Saitoh, K see Sugiyama, N 59
San Emeterio Prieto, see Rosa, R C 297
Sim, R M CAM in batch production 91
Soane, A J M Finite-element method and reinforced concrete slabs (DOC case study) 102
Sugiyama, N Electron-beam exposure system AMDES 59
Szygenda, S A see Yea, Y H 315
Taylor, V T see Madden, J 142
Thompson, B G J DOC case study 305
Tosiyasu, L Architecture of a virtual graphic database system for CAD 132
Typia, M Minimizing 'cut and fill' costs in roadmaking 337
Tsubaki, M Family generation in integrated engineering systems 136
Vlach, M see Majj, I N 37
Williams, C M Scanning digitizers 227
